BACKEND DEVELOPER

SUMMARY

- Back-end developer with experience in creating robust, scalable and secure applications, using modern technologies and frameworks.
- Knowledge of ASP.NET / C#, Python, ORACLE DB, Angular and Java, with mastery in the development and consumption of REST and SOAP APIs.
- Skilled with version control and continuous integration tools, such as Azure DevOps, Bitbucket, SVN and Git, applying agile methodologies (Scrum) for project management.
- Experience in software development with .NET 4.6.2 / C#, SQLite / SQL Server, JavaScript and Confluence, prioritizing high-performance solutions.
- Experience in creating responsive web interfaces with C#, SQL Server, CSS, HTML and Bootstrap, always focused on delivering results aligned with business needs.

PROFESSIONAL EXPERIENCE

VICERI SEIDOR

Technology solutions and services

Backend Developer

2024 -2024

- Development and maintenance of systems for the insurance sector, using technologies such as ASP.NET / C#, ORACLE DB, SQL SERVER Angular, Java and SOAP APIs. Worked on collaborative projects with multidisciplinary teams, using tools such as Azure DevOps, Bitbucket and Git, in addition to agile methodologies (Scrum) to ensure the efficiency and success of deliveries.
- Responsible for conducting the migration of the client's database, updating the system from version SQL Server 2014 to 2022, with support from Data Migration Assistant (DMA). The project included rewriting views, triggers and procedures, ensuring the compatibility and optimization of the database in the new version, meeting the client's needs and improving system performance.
- Implemented a solution to correct inconsistencies in the client's system related to file extensions, which prevented them from being opened. The solution consisted of creating a function to standardize file names and extensions, ensuring the full functioning of the system and improving the user experience.

TATSOFT

Industrial software manufacturers for SCADA, HMI and IIOT systems

Junior Programmer

2022-

2024

- Maintenance and enhancement of functionalities for SCADA software (FactoryStudio/FrameworkX). Responsible for technical support via Help Desk, offering service via email and video calls to national and international customers. Skills in C#, databases and communication protocols (Modbus, MQTTSpB, CTC, Contrologix).
- Conducting tests to validate the operation of the software and communication protocols. Creating videos and explanatory documents on the operation of the software. Experience in NET 4.6.2 / C#, SQLite / SQL Server, JavaScript, APIs and Confluence.
 - Conducting the update and maintenance of documentation related to unified namespaces, integrations and solution examples, ensuring the accessibility of information.

SCOPE - SYSTEMS COPORATE SYSTEMS

Business Integration Solutions

Software Development Intern 2022

2022-

- Responsible for bug fixes and implementing new features on a dashboard website for the company's internal backoffice system.
- Provided technical support to customers, ensuring effective problem solving and continuous system improvement.
- Experience with technologies such as C#, SQL Server, CSS, HTML, Bootstrap and SVN, contributing to the platform's performance and usability.

ACADEMIC BACKGROUND AND LANGUAGES

- ***Bachelor's Degree in Computer Science – Federal Institute of Triângulo Mineiro – Brazil 2022***
- Native – Portuguese
- English Fluent

CERTIFICATIONS

- AWS Certified Cloud Practitioner – Amazon
- PostgreSQL Essential Training – LinkedIn
- Data Visualization in Python – Udemy
- GFT C# Bootcamp – DIO
- GFT Start .NET Bootcamp #4 – DIO
- Abstracting an RPG Game Using Object Orientation with C# – DIO
- MYSQL Database – UDEMY
- Business Intelligence IT & Analytics – UDEMY
- Data Structures and Algorithms – DIO
- Introduction to Git and GitHub – DIO
- Introduction to Computer Programming – UDEMY
- Agile Projects with SCRUM – DIO
- Data Visualization in Python – UDEMY
